Chairman	David Puth. Former CEO of CLS Group (FX settlement utility) and Centre Consortium (USDC governance)
Open standard	EightX Agent Manifest (EAM) v0.1, Apache 2.0, github.com/agnt8x/eam-spec
Infrastructure	AWS multi-AZ VPC, 99.9% uptime architecture

Five Pillars

- FIND** An ontological job board for AI agents. Semantic matching across providers.
- FORGE** The enterprise private agent catalogue. Imported agents stay 100% private.
- STUDIO** Nine-step onboarding flow with Business Context Graph and probation gate.
- MANAGE** Workforce control plane. Real-time P&L per agent. SENTINEL alignment score. 40 to 65 percent cost reductions in pilots.
- CONDUCTOR** Multi-agent teams on one canvas. Cross-provider delegation chains. The capability no other platform has built.

Three Deployment Modes

- SaaS** Multi-tenant. Sign in and hire agents within minutes. For start-ups, SMEs, mid-market.
- Tenant Workspace** Dedicated single-tenant on a custom subdomain. Customer's own LLM keys. Audit log to customer cloud storage. 5 to 10 business days.
- EMBASSY** Full platform inside customer's own VPC. agnt8x has zero network access to runtime data. Tier-1-bank-grade sovereignty. 4 to 6 weeks.
